Stage 1 - UltraCeram® Stera 0.5 Micron Absolute Pre-Filter

Diagram 2 - The UltraCeram® Stera Filter Cartridge
Made in UK

1 Manufactured with UltraCeram® Stera Ceramic which provides genuine sub-micron filtration. This stage reduces fine particulate matter, bacteria, cysts and turbidity. Silver, incorporated within this ceramic structure provides enhanced bacteriostatic and self sterilizing properties.

✓ Mechanically filters out harmful bacteria and parasites.

Removes	
Parasites/Cysts	Salmonella
Cryptosporidium	Cholera
Giardia	Sediment
Bacteria	Dirt
e-Coli Bacteria	Rust

✓ Removing the above contaminants protects the Carbon Block Post Filter cartridge, allowing it to function more effectively and last longer.

Diagram 3 - The UltraCeram® Fluoride Filter Cartridge
Made in USA

✓ EPA Listed Media

Stage 2 - UltraCeram® Fluoride Filter

2 The fluoride removal media is made from the same mineral that rubies and sapphires (corundum) are made from, in crystalline form. The process 'selective adsorption' is a physical/chemical reaction whereby the fluoride ions are removed by binding to the media's oxidised surface. This highly porous material has a large surface area of 200meter² per gram for optimal filtration.

Removes
97.6% - 99.0% Fluoride

*We recommend replacing your UltraCeram Stera cartridge every 2-3 years and the Carbon Block cartridge yearly dependent on water quality and usage.

Stage 3 - Carbon Block 1 Micron Post-Filter

Diagram 4 - Carbon Block Post Filter Cartridge
Made in USA

3 The 1 micron Carbon Block filter effectively removes chlorine, heavy metals and the unpleasant tastes and odour associated with these contaminants.

Made from premium coconut-shell carbon, fresher, sweeter tasting water is ensured.

Removes	
Chlorine	Lead
Aluminium	Mercury
Cadmium	Zinc
Copper	Odour
Iron	Taste

✓ This combination of ultra-fine Ceramic and quality Carbon Block will provide you and your family with superior quality filtration and much improved taste compared to other standard twin filter systems.

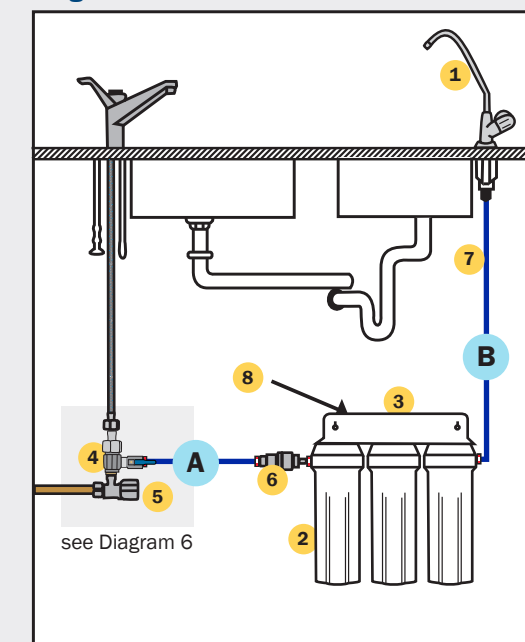

✓ **Scrub Clean Cartridge**

If the flow rate slows, the UltraCeram® Stera filter cartridge can be washed and reused*.

Simply scrub it clean under cold, running water with a clean Scotch-Brite® pad or kitchen brush.
