For ease of maintenance; opening and closing the filter housing.

20" Triple Big Blue System

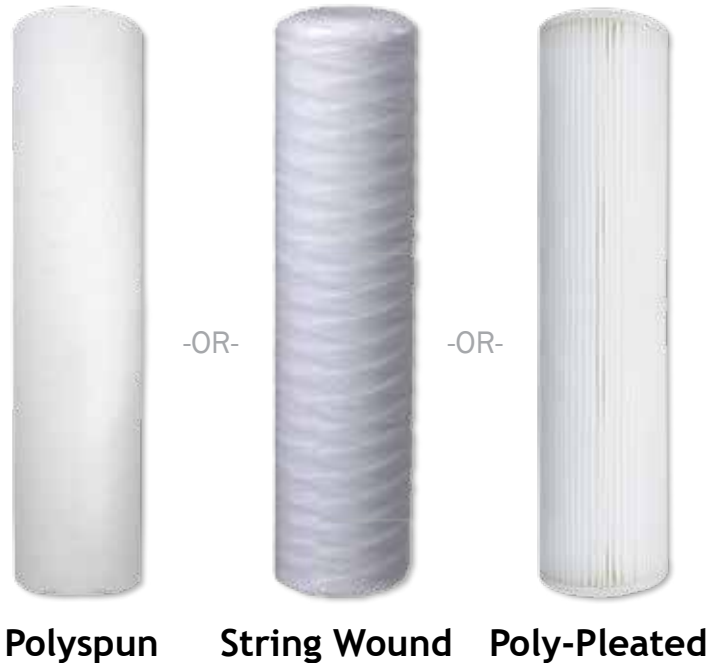

Available Filter Cartridges

Within this Triple Big Blue System you can install one sediment filter with two carbon filters giving a flow rate of 60 litres per minute (i.e. double the flow rate).

1 FIRST STAGE Sediment Pre-Filter

Specialised in removing all particulate matter from your water supply, sediment cartridges are ideal to serve as pre-filters.

SEDIMENT FILTRATION EFFECTIVELY REMOVES	
Algae	Sand
Dirt	Sediment
Particulate Matter	Silt
Rust	

2 SECOND STAGE Carbon Filter

Carbon filters employ a high grade carbon with industry-leading surface area allowing for the greatest efficiency of the carbon absorption.

Carbon Block **GAC**
(GRANULAR ACTIVATED CARBON)

3 THIRD STAGE Carbon Polishing Filter

Carbon filters employ a high grade carbon with industry-leading surface area allowing for the greatest efficiency of the carbon absorption.

CARBON FILTRATION EFFECTIVELY REMOVES	
Algae	Odour
Chemicals	Pesticides
Chlorine	Heavy Metals
Unpleasant Taste	Cysts

**Triple Action
Carbon**
