**Plumbing Options**

We stock a large supply of brass plumbing parts and John Guest Speedfit® fittings to cater to your plumbing requirements.

1/2" Male Female Compression Tee\*

1/2" Male Male Tee\*

3/4" Male Female Dishwasher\*

\*All Fittings include a Pressure Limiting Valve (PLV)

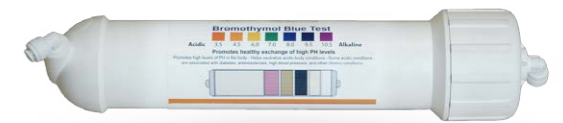

**AlkaHydrate Filter**

The perfect addition to any water filtration system!

The **AlkaHydrate** filter raises pH levels as well as producing antioxidant and oxygenating qualities. The filter also emits far-infrared rays which result in shorter cluster chains in the water molecules - increasing the bio-available response and oxygen absorption in the body.

Item #0546

**Kalcor Alkalising Filter**

The **Kalcor** filter can be used as a stand-alone alkalising filter raising the pH from sub-neutral to neutral or slightly alkaline pH levels.

Using naturally occurring minerals, it can be employed as a pre-alkalising filter especially suited to rain water tanks with a low pH, followed by the **AlkaHydrate** filter to achieve higher pH levels.

Item #0155

Doulton Twin Alkaliser

- 1 Stage 1 - Doulton Ceramic Filter  
Sediment, Bacteria and Parasite Removal (UK)
- 2 Stage 2 - Sub-Micron Coconut Carbon Filter  
Heavy Metal Removal (USA)
- 3 Stage 4 - AlkaHydrate Filter  
ORP Lowering and pH Raising (USA)

Item #2796

Our Twin System consists of a Doulton Ceramic Cartridge (UK) and a High Quality Sub-Micron heavy metal removing Carbon Block Filter (USA). The additional stages have been designed to raise the pH reading from low acidic levels to higher alkaline levels.

Doulton Twin Rain Water Tank Alkaliser

- 1 Stage 1 - Doulton Ceramic Filter  
Sediment, Bacteria and Parasite Removal (UK)
- 2 Stage 2 - Sub-Micron Coconut Carbon Filter  
Heavy Metal Removal (USA)
- 3 Stage 3 - Proprietary Kalcor Alkalisng Filter  
Stabilizing pH (USA)
- 4 Stage 4 - AlkaHydrate Filter  
ORP Lowering and pH Raising (USA)

Item #2790

Ultra High Purity Reverse Osmosis Alkaliser

This system is plumbed in with a dedicated faucet or mixer tap. A storage tank is required to hold a reservoir of pure water to dispense on demand.

- 1 Stage 1 - 1 Micron Polyspun Sediment Filter
- 2 Stage 2 - 5 Micron Coconut Pre-Carbon Filter (USA)
- 3 Stage 3 - High Purity (0.0005 micron) Membrane (USA)  
Stage 3a - Storage Tank
- 4 Stage 4 - 5 Micron Coconut Post-Carbon Filter (USA)
- 5 Stage 5 - AlkaHydrate Filter (USA)

Item #2798

Your choice of designer faucets...

We offer a wide range of faucets that are suitable to cater to these and other systems.

Please turn over for more details.

R04000 Countertop Reverse Osmosis Alkaliser

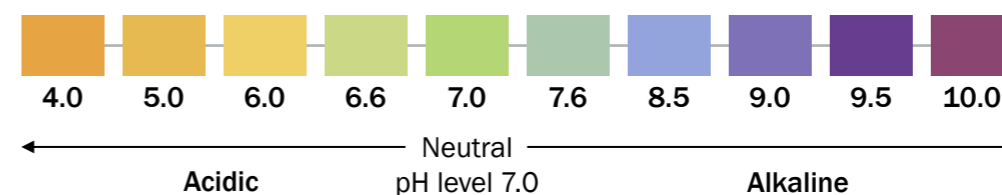

Ideal for those who are renting, this portable and convenient RO system easily connects to your kitchen tap's aerator thread (male/female adaptor included).

- 1 Stage 1 - 1 Micron Polyspun Sediment Filter
- 2 Stage 2 - 5 Micron Coconut Carbon Filter (USA)
- 3 Stage 3 - High Purity (0.0005 micron) Membrane (USA)
- 4 Stage 4 - 5 Micron Coconut Carbon Filter (USA)
- 5 Stage 5 - AlkaHydrate Filter (USA)
