The Australian WaterMark Standard Approval of this system is your **guarantee** of quality.

Specifications	
Filter Output	5,000 litres
Max Flow Rate	3 litres p/min
Dimensions (cm)	23(W) x 32(H) x 13(D)
Micron Rating	0.2 Micron nominal
Warranty	5 years*

*Warranty Terms & Conditions apply.

Filtration Test Results		
IMPURITIES	REDUCTION %	
e-Coli	99.99	
Residual Chlorine Content	99.0	
THM	Bromodichloromethane	99.3
	Bromoform	99.3
	Chloroform	99.5
	Dibromochloromethane	99.3
METALS	Zinc	99.7
	Iron, Lead, Manganese, Cadium	99.9
	Copper, Mercury	99.9
	Aluminium	98.7

How does it work?

The UltraCeram Twin Undersink combines ultra-fine Ceramic technology with a premium one micron Carbon Block filter cartridge manufactured in the USA. This filter cartridge combination guarantees absolute sub-micron filtration and 99.99% removal of contaminants such as e-Coli, chlorine and heavy metals.

Conveniently installed under your sink with your choice of an attractive, designer ceramic disc faucet included at no extra cost.

ULTRACERAM

Stage 1 - UltraCeram® Stera 0.5 Micron Absolute Pre-Filter

Diagram 2 - The UltraCeram® Stera Filter Cartridge

1 Manufactured with UltraCeram® Stera Ceramic which provides genuine sub-micron filtration. This stage reduces fine particulate matter, bacteria, cysts and turbidity. Silver, incorporated within this ceramic structure provides enhanced bacteriostatic and self sterilizing properties.

✓ Mechanically filters out harmful bacteria and parasites.

Removes	
Parasites/Cysts	Salmonella
Cryptosporidium	Cholera
Giardia	Sediment
Bacteria	Dirt
e-Coli Bacteria	Rust

✓ Removing the above contaminants protects the Carbon Block Post Filter cartridge, allowing it to function more effectively and last longer.

Stage 2 - Carbon Block 1 Micron Post-Filter

Diagram 4 - Carbon Block Post Filter Cartridge

2 The 1 micron Carbon Block filter effectively removes chlorine, heavy metals and the unpleasant tastes and odour associated with these contaminants.

Made from premium coconut-shell carbon, fresher, sweeter tasting water is ensured.

Removes	
Chlorine	Lead
Aluminium	Mercury
Cadmium	Zinc
Copper	Odour
Iron	Taste

✓ This combination of ultra-fine Ceramic and quality Carbon Block will provide you and your family with superior quality filtration and much improved taste compared to other standard twin filter systems.

Scrub Clean Cartridge

✓ If the flow rate slows, the UltraCeram® Stera filter cartridge can be washed and reused*.

Simply scrub it clean under cold, running water with a clean Scotch-Brite® pad or kitchen brush.

Twin Undersink Assembly

Diagram 3 - Labelled Assembly of Quality Components

Quality Components	
1	UltraCeram® Stera Ceramic Pre-Filter
2	Carbon Block Post Filter
1	Housing Sump
2	Housing Cap
3	Stainless Steel Bracket
4	Pressure Limiting Valve (PLV)
5	John Guest Elbow (with Red Clips)
6	Brass Nipple

Available plumbing options

We stock a large range of brass plumbing parts and John Guest Speedfit® fittings for your plumbing requirements. All fittings include a Pressure Limiting Valve.

Undersink Setup

- 1 Housing
- 2 Chrome Faucet
- 3 Stainless Steel Bracket
- 4 Pressure Limiting Valve
- 5 Tee Piece
- 6 Ministop Valve
- Red Clips
- A 1/4" blue tube connects the feed water valve to the pre-filter.
- B 1/4" blue tube connects the post filter to the chrome faucet.
