

Whole House/High Flow Triple Systems

featuring Polyspun Pre-Filter and Aragon Plus Filter Cartridge

Aragon Plus Patented Filter Media
Made in Europe

High Grade 304 Stainless
Steel Bracket and Pressure Gauges

The Big Blue filtration systems are specifically designed to cater to areas where a high flow rate is needed. Installed on mains plumbing, sediment and chlorine are removed from all faucets/ showers throughout the premises, at up to 50 litres per minute, protecting tap washers, hot water systems and appliances.

A wide range of filters are available to meet your water quality requirements. Our recommended filter combination is detailed overleaf.

CALEFFI Pressure Valves

Made in Italy

Our Big Blue filter systems are fitted with Caleffi Pressure Reducing Valves to safeguard your water filter.

10" Big Blue Triple Systems

Item No. 3982
Triple System (Empty)

Triple System with Stand (Empty)

20" Big Blue Triple Systems

Item No. 3985
Triple System (Empty)

Item No. 3950
Triple System with Stand (Empty)

Item No. 4387 Cover only

Whole House/High Flow Triple Systems

WaterMark Certificate No.: 23124 The Australian WaterMark Standard Approval of this system is your guarantee of quality.

Filtration Efficiency

Impurities	% Reduction
Chlorine	100
Particles >2 microns	99.999
Turbidity	99
Aluminium	97
Lead, Zinc, Cadmium, Cesium	95
Chloramines	>90
Pesticides	92
Iron, Oil Products	90

Specifications

Water Temperature	+4°C to +75°C
Max. Flow Rate	up to 50 litres p/min
Polyspun Filter Capacity	5,000 litres
Aragon Plus Filter Capacity	60,000 litres
Warranty	5 years*

This stage effectively filters sediment, rust, dirt and other particulate matter. Manufactured with a triple-layer structure to maximise the contaminant holding capacity and filter life.

- Effective removal of all particulate matter.
- Manufactured by thermal bond without the use of binders or adhesives.

The patented second stage mechanically filters impurities through the surface layers with extremely high accuracy.

Filtration Process

SGS-polymers have shown the best results in the complex removal of harmful impurities. Elements and compounds including heavy metals and radioactive materials are removed through ion-exchange and sorption mechanisms.

The Aragon solid block material is a bacteriostatic polymer made from additives of silver and granules of ion-exchange resins. Hardness salts, dissolved and colloidal iron, heavy metals and there compounds are removed through the resin and polymer ion-exchange properties. The Aragon filter capacity also provides removal of active chlorine, chloramines, chlorine containing compounds and organic compounds.

- ◆ Tested by Certified Laboratories in Europe to effectively remove chemicals, pesticides, bacteria, heavy metals to >2 microns.
- ♦ Ideal for both potable and non-potable water.

A final polishing filter; improves flow rate and guarantees fresh, sweet tasting water!
